

The water Cycle

Rain falls on the ground and forms puddles. The sun comes out and the water from the puddles evaporates. **Evaporate** means to change from a liquid to a gas.

Water moves into the air as a gas when it evaporates. This gas is called **water vapor**.

You cannot see water vapor.

Water falls back to the Earth from clouds. This is called the water cycle.

Name _____

Answer the following questions based on the reading passage. Don't forget to go back to the passage whenever necessary to find or confirm your answers.

1) What is the process of evaporation?

2) When water evaporates what is another name given to the gas?

3) Water falls back to the Earth from where?

4) This whole process is called what?

The water Cycle

Rain falls on the ground and forms puddles. The sun comes out and the water from the puddles evaporates. **Evaporate** means to change from a liquid to a gas.

Water moves into the air as a gas when it evaporates. This gas is called **water vapor**. You cannot see water vapor. Water falls back to the Earth from clouds. This is called the water cycle.

ANSWERS

Name _____

Answer the following questions based on the reading passage. Don't forget to go back to the passage whenever necessary to find or confirm your answers.

1) What is the process of evaporation?

Means to change from liquid to gas

2) When water evaporates what is another name given to the gas?

Another name is water vapRr

3) Water falls back to the Earth from where?

Clouds

4) This whole process is called what?

Water cycle
