

Air, Land, Water

Earth is made of many things.

Earth has water. Water covers 71% of the Earth's surface, and is important for all known forms of life.

Earth has land. Land covers the rest or only 29%

The outer part of Earth is called the surface. Earth has more water than land.

Air is all around earth. Air surrounds Earth and becomes thinner farther from the surface you go. Roughly 100 miles (160 kilometers) above Earth

Answer the following questions below.

1. Look at the diagram of Earth. **Color the water blue. Color the land green.**

2. What is the outer part of Earth called?

_____ **The Surface** _____

3. **True or False:** Earth has more land than water.

___ **False** _____

4. This is found all around earth.

___ **air** _____

5. **True or False:** Earth is made of many things.

___ **True** _____
