Lesson 2 Subtract Fractions with Like Denominators

Name _____

Directions: If you click on one of the two above icons they will allow an instructional video to play and illustrate subtracting mixed numbers. Some problems Watch how that is done!

Example 1 $\dfrac{5}{12} - \dfrac{1}{12} = \dfrac{4}{12}$

Example 2 $\dfrac{8}{11} - \dfrac{6}{11} = \dfrac{2}{11}$

1) $\dfrac{11}{12} - \dfrac{7}{12} =$

2) $\dfrac{3}{9} - \dfrac{2}{9} =$

3) $\dfrac{7}{8} - \dfrac{1}{8} =$

4) $\dfrac{2}{10} - \dfrac{1}{10} =$

5) $\dfrac{5}{10} - \dfrac{1}{10} =$

6) $\dfrac{4}{5} - \dfrac{3}{5} =$

7) $\dfrac{2}{3} - \dfrac{1}{3} =$

8) $\dfrac{4}{11} - \dfrac{1}{11} =$

9) $\dfrac{5}{7} - \dfrac{3}{7} =$

10) $\dfrac{3}{4} - \dfrac{1}{4} =$
